Issue You received a file from a consultant, and you cannot see certain objects within that file.. For example, you might have received: A drawing from a civil engineer that contains contours, spot elevations, and other topography objects, and these objects are either missing or just showing as a box (typically a green box with test or an exclamation mark symbol).. A drawing from an architect that is also missing objects such as spot elevations or architectural objects – either missing completely or represented by a box.

Cause The lines are likely invisible because of an issue with Proxy Objects Solution.. There are a few things to be aware of though, the newer DWG formats support the latest features in your version of AutoCAD.. AutoCAD has the ability to back save to any previous DWG version By default AutoCAD will save to the latest DWG version it supports but you have the option to override this when saving..
